

**Inherited Genetic Disorder Test Results  
for  
AI Sires Tested as of 2-26-2011**

NOTE, the F13 test is still in R&D as a positive control animal has not been identified in the US or Australia. We will continue to run this test and report the results to the American Wagyu Association (the "Association"), and if and when a Positive animal is identified by the test, staff from iGenix will work with the breeder and the Association to validate the results. When the validation is complete iGenix will begin reporting on this disorder to the member.

DISCLAIMER - Genetic test results are based on samples provided by breeders. The American Wagyu Association (AWA), the AWA Board of Directors (BOD), and iGenix Inc. make no statements, representations or warranties about the accuracy or completeness of, any information relating to the status of a particular animal; and, disclaims all responsibility for information and all liability (including without limitation, liability in negligence) for all expenses, losses, damages, and costs you may incur as a result of information being inaccurate or incomplete in any way for any reason.

By proceeding to the results page you agree that you have read and accepted AWA, iGenix Inc. and BOD policy above.
