

How To: Record Commerical Animal Data

Recording commercial animal data in the American Wagyu Association Registry Service is easy with just a few simple steps.

After logging in to Digital Beef, Select Commerical under Herd Management / Recording.

Enter the animal name, choose the sex, enter birth date and Breed information. Once complete, click Create.

For animals registered with another breed association used as a sire or dam with registered Wagyu animals, please send a copy of the registration certificate to the AWA office at office@wagyu.org. The animal will be added to the AWA Registry and will then appear with their corresponding pedigree in the members herd.
